## SICP

God's Programming Book

Lecture-o1 Computer Science

### Computer Science

Slides Adapted from cs61a of UC Berkeley

#### About the Course

#### Parts of the Course

- Lecture: What we are doing now
- Lab, Homework: More practice
- Project: The most important part of the project
  - There will be handouts of all the above parts (in English)
- Online textbook: <a href="http://composingprograms.com">http://composingprograms.com</a>

#### **Asking Questions**

- Search the Friendly Web (STFW)
- Read the Friendly Manual (RTFM)
- Turn to the Friendly Python Tutor

https://pythontutor.com/composingprograms.html#mode=edit

Take Advantage of the Friendly Comment Section

# An Introduction to Computer Science

#### What is Computer Science?

• The study of

- What problems can be solved using computation,
- How to solve those problems, and
- What techniques lead to effective solutions

#### What is Computer Science?

Systems Artificial Intelligence **Robotics Graphics** Security Networking **Programming Languages** Theory Scientific Computing . . .

Decision Making

Robotics

Natural Language Processing

Translation

...

#### What is This Course About?

- A course about managing complexity
  - Mastering abstraction
  - Programming paradigms
- An introduction to programming
  - Full understanding of Python fundamentals
  - Combining multiple ideas in large projects
  - How computers interpret programming languages

#### What is This Course About?

• Different types of languages: Scheme & SQL

A challenging course that will demand a lot of you

# Functions, Values, Objects, Interpreters, and Data

(Demo)

## Thanks for Listening
